We're regulated by the the world's biggest supervision authorities

Our award - winning trading solutions are shaped to help you achieve your trading ambitions

Our company

Polaris Pro Limited is a registered digital asset investment firm based in USA. The platform, which includes advanced bWEB and technical analysis at the source of high return performance, offers high & fixed interest return. Aiming for success with its international investor network, experienced team, privileged information from business and technology world; Polaris Pro Limited stands out from its competitors with its proven quality and ease of use. The company, which is managed under the leadership of people who think and foresee the future, is committed to achieving high returns from well-diversified portfolios and prioritizing clients.

All our employees have careers in large corporations dealing with the multiplication of clients' money. Based on their professional experience, they invest using all available forms such as investing in gold, currencies, oil, real estate, listed companies and the most popular and profitable field of Cryptocurrency, start-ups and ICOs. All of the above factors influence our generation of profits up to 20% in 1 day.

Successful investment management companies base their business on a core investment philosophy, and Polaris Pro Limited is no different. Although we offer innovative and specific strategies through digital asset funds, an overarching theme runs through the investment guidance we provide to clients— focus on those things within your control. There are bWEBally four principles that we attach great importance to:

- 1) Create clear, appropriate investment goals: An appropriate investment goal should be measurable and attainable. Success should not depend on outside investment returns or impractical saving or spending requirements.
- 2) Develop a suitable asset allocation using broadly diversified funds: A sound investment strategy starts with an asset allocation befitting the portfolio's objective. The allocation should be built upon reasonable expectations for risk and returns and use diversified investments to avoid exposure to unnecessary risks.

3) Minimize cost: Markets are unpredictable. Costs are forever. The lower your costs, the greater your share of an investment's return. And research suggests that lower-cost investments have tended to outperform higher-cost alternatives. To hold onto even more of your return, manage for efficiency. You can't control the markets, but you can control the bite of costs and efficiency.

4) Maintain perspective and long-term discipline: Investing can provoke strong emotions. In the face of market turmoil, some investors may find themselves making impulsive decisions or, conversely, becoming paralyzed, unable to implement an investment strategy or rebalance a portfolio as needed. Discipline and perspective can help them remain committed to a long-term investment program through periods of market uncertainty.

Digital assets are a class of assets considered dangerous and inconvenient. Many reasons such as liquidity, money laundering accusation, uncertainty of regulation, access restriction, volatile markets, functionality inquiries reduce trust in these assets. We believe that the risk factor should be eliminated for all people who believe that finance will rise on distributed systems. That's why we offer high interest returns to platform investors. With careful and detailed examination of market conditions, daily trading volume, expectations; we change our portfolio distribution and adjust our investment strategy. With this active fund management, you enjoy the fixed interest rate return on the user side.

THE ADVANTAGE

NO COMMISSIONS. NO FEES.

NO HASSLE. NO BRAINER

We know that hidden fees, surprise costs and unexpected charges can take a good chunk out of your investment.

With our VIP Black account you can trade with zero commissions and razor-thin spreads on all markets, resulting in tremendous savings.

EXPERIENCE

A team with 40+ years experience in providing the most advanced trading solutions for FX and CFDs

INNOVATIVE

Power up your trading with innovative products like the Polaris Pro Limited, which lets you undo losing trades if the markets move against you.

The logo for Polaris Pro Limited is positioned vertically in the center of the image. It features a stylized red and white icon on the left, followed by the word "Polaris" in a bold, red, sans-serif font, and "Pro Limited" in a white, sans-serif font below it. The background of the entire image is a high-angle view of a modern office building's glass facade, with several people in business attire standing on a balcony or walkway, looking out over a cityscape.

24/5 SUPPORT

We're on standby by email or live chat to help you with trading, funding, withdrawals, anything you need.

What are cryptocurrencies?

Cryptocurrencies, or cryptos, are digital currencies which operate outside of the banking system and aren't controlled by governments. They are typically used to carry out secure transactions over the blockchain. Just like traditional currencies, these cryptos can be used, owned, exchanged and speculated on.

Markets on cryptos never close, meaning you can trade at any time on any day, including weekends and public holidays.

Why Trade Crypto CFDs?

Go short or long Enter the markets when you expect a price drop, not just when you expect it to go up.

Trade with leverage Increasing your trade size using leverage. Leverage can increase potential losses as well as gains.
